# APPLICATIONS

## Retaining Wall

**Flowtech™** reduces water buildup behind retaining walls and efficiently redistributes the water back into the soil.

## Foundation Wall

**Flowtech™** directs water away from foundation walls to keep basement free of water and mildew.

## Swimming Pools

**Flowtech™** channels excess water away from perimeter of pool to reduce static pressure and heaving from freeze.

## Downspouts/Roof Runoff

**Flowtech™** moves water away from the house foundations

## Sump Pump

**Flowtech™** allows water removed from a french drain to be redirected away from the basement/foundation to help the french drain work efficiently.

## Septic

**Flowtech™** septic system is the ultimate in onsite septic systems compared to gravel and multi-pipe system. Easy to install.
